Site	New Vetinerian Laboritories
Client	DEFRA
Main Contractor	Shepherd Construction
Engineer	Shepherd Construction
Architect	Shepherd Construction
Duration	27 weeks
Value	£3.5m

Description

This was a return to the research centre in Weybridge, and we were engaged to construct the sub and super structures for the new research laboratories. The foundations were traditional pile caps and ground beams, with an element of specialist drainage. The super structure is an RC frame, to 4 storeys with a very interesting waffle slab detail at 2nd floor. Co-ordination issues were very important, owing to the high level of IT and M & E installations
