

Market Sector	Commercial, Offices
Site	Aviator Park Addlestone
Client	Brixton plc
Main Contractor	Wates
Engineer	Waterman's
Architect	EPR
Duration	40 weeks
Value	£4m

**Description**

We developed the substructure design for 101000 ft<sup>2</sup> high quality offices, in conjunction with our sister company O'Keefe Soil Remediation. We provided a complete substructure design solution in a wet and contaminated site. By using Stabilisation as a solution we were able to minimise the traffic impact locally, with a reduction of some 2-3000 traffic movements. The final design incorporated the ground slabs into our stabilised platform which doubled as pile mats and dry working platforms.
