Duration	26 Weeks
Value	£2m

Description

Work at **Clacton County High & Bishops Park** involved construction within the heart of the existing buildings to form a new dining and social area. This required erection of a steel frame to support the enclosing roof structure within a confined courtyard area. At the same time construction of the new gymnasium facility was carried out, which followed the demolition of the temporary sixth form block and a stair tower which occupied part of the new gymnasium footprint.
