

Market Sector	Commercial Hotel
Site	Brentford Lock
Client	Holiday Inn
Main Contractor	Bowmer & Kirkland
Duration	45 weeks
Value	£1.50m

Description

We were employed to construct the Basement substructure, which consisted of Sheet piled walls lined with concrete on a piled raft foundation. We had full responsibility for the temporary works and waterproofing. This was an interesting challenge as the site was bounded on three sides by the Grand Union Canal. The 5 storey super structure concrete frame was self finished for direct decoration.
