Value	<b>£680,000</b>

**Description**

Improvements to this 60's office building provided an extra 5000 m<sup>2</sup> of office space. Our package was the substructure construction for the extensions. The new building had to be supported above 2 levels of existing underground car parking. The whole building was hung off six, 600mm dia. tubular steel columns, which rise up through the building and project above the roofline.
