Chatham Docks, Kent ME4 4SW

**Description**

At Chatham Docks we produce a selection of Hydraulically Bound Materials and Recycled Aggregates for use in Road Construction, Highway Reinstatement and other applications for the Utilities and Construction Industries.

Materials range includes;

- Graded Crushed Concrete
- Oversize Gravels
- Recycled Gravels
- Sand
- Recycled Type
- PV1 SHW Type 1
- SMF (alternatice to 6F1)

All our materials are tested regularlay to meet required standards and with the facilities that we have developed at Chatham Docks, bespoke materials can be engineered to meet your needs.
